## Summary Corrective Action Plan

The intent of this form is to assist departments in writing a corrective action plan summary for attachment to the settlement documents developed for the Board of Supervisors and/or the County of Los Angeles Claims Board. The summary should be a specific overview of the claims/lawsuits' identified root causes and corrective actions (status, time frame, and responsible party). Date of incident/event:	June 28, 2013
Claim:	Azadeh Mardani
Briefly provide a description of the incident/event:	<p>A sewage backup occurred at 29844 Knoll View Drive in the City of Rancho Palos Verdes. The effluent overflowed into various rooms of the residence and caused damage to the interior, furniture, and personal property of the claimant. The backup also caused sewage to overflow into the claimant's backyard, which damaged the landscaping.</p> <p>On the day of the incident, Sewer Maintenance Division (SMD) received a service request concerning a sewage overflow at the claimant's residence. An SMD crew responded to the location and observed sewage overflowing from Manhole No. 239 of Sewer Maintenance District Map No. S-1654. The SMD crew cleared the sewer mainline between Manhole Nos. 237 and 253 and broke down a root blockage. The sewer lines were left flowing normally.</p> <p>Remediation under the Rapid Response Program was initiated at that time. Carl Warren &amp; Company contacted ATI to provide cleanup services.</p>

1. Briefly describe the root cause(s) of the claim/lawsuit:

The sewer overflow at Manhole No. 239 was caused by tree roots in the sewer mainline. The sewer mainline was last inspected on March 13, 2013, as part of the Preventive Maintenance Program. At that time, sewer flow conditions were observed to be normal.

The proximate cause of the property damage is the property owner's failure to install and maintain a backflow valve in accordance with the California Plumbing Code as adopted by the City of Rancho Palos Verdes.

County of Los Angeles  
Summary Corrective Action Plan

2. Briefly describe recommended corrective actions:  
(Include each corrective action, due date, responsible party, and any disciplinary actions if appropriate)

As a precautionary measure, the sewer main line was placed on a quarterly hydro root-saw periodic, and will remain on this schedule until it is no longer deemed necessary by maintenance personnel. The sewer manholes will also continue to be inspected semi-annually as part of SMD's Preventive Maintenance Program.

3. Are the corrective actions addressing department-wide system issues?

☐ Yes - The corrective actions address department-wide system issues.
